15bn

Total Deaths

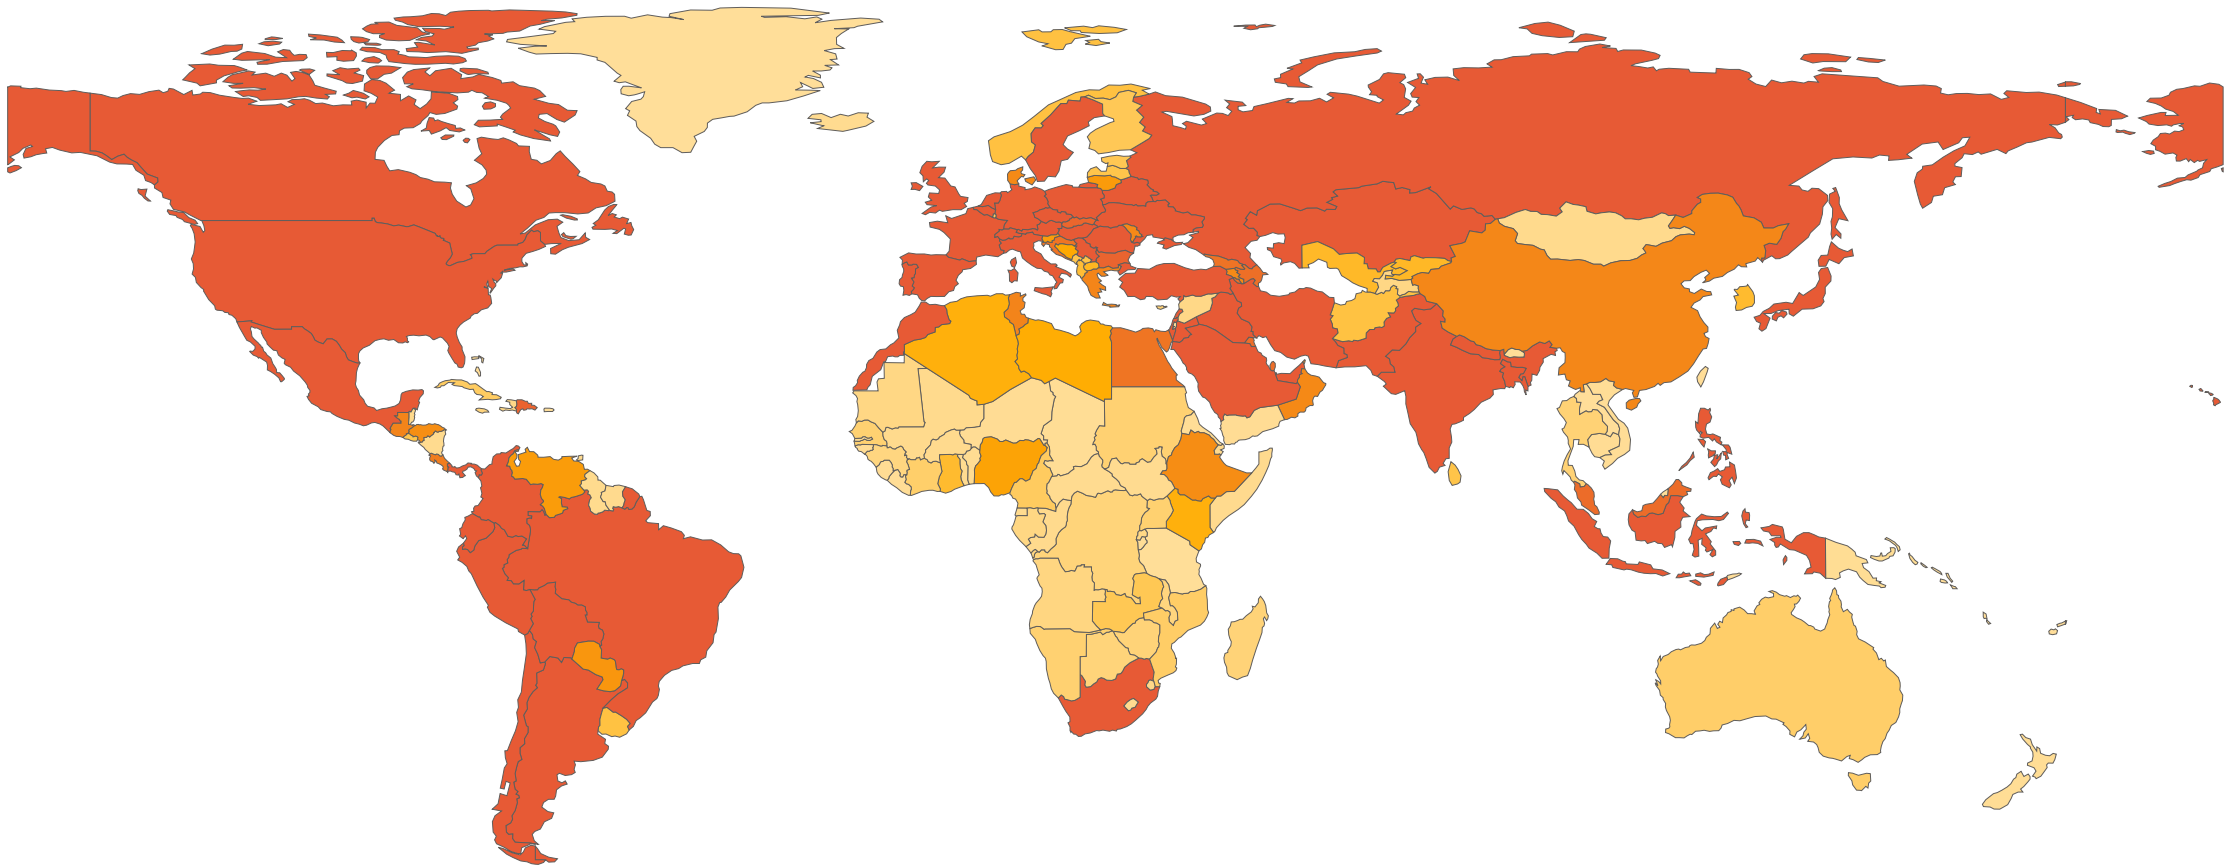

624M

Average Recovery Rate

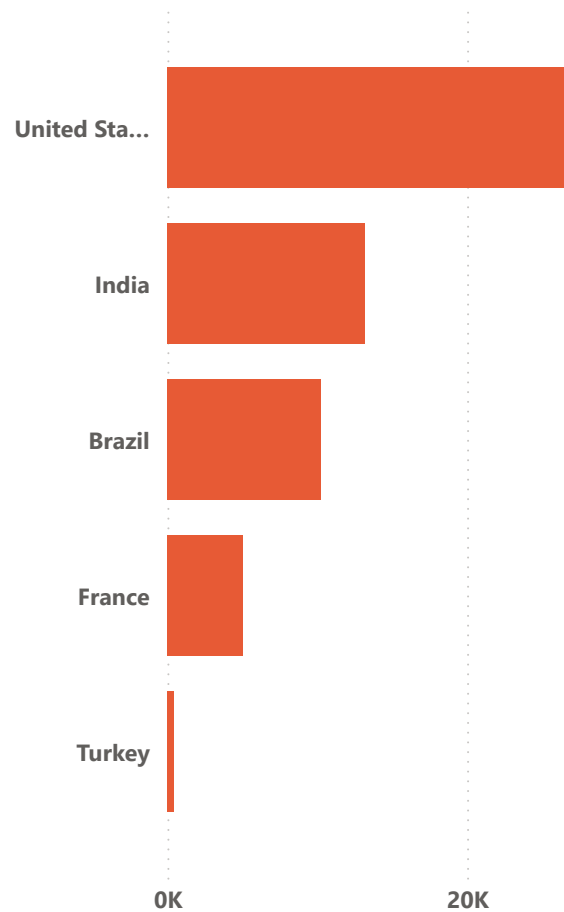

0.59

Average Mortality Rate

0.02

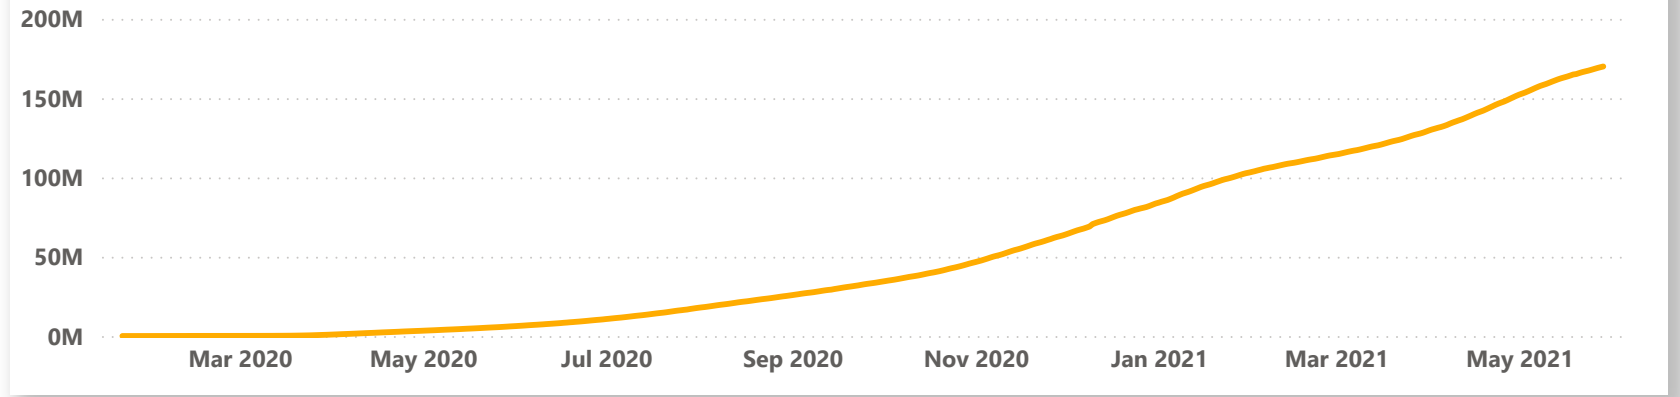

Highest Daily New Cases

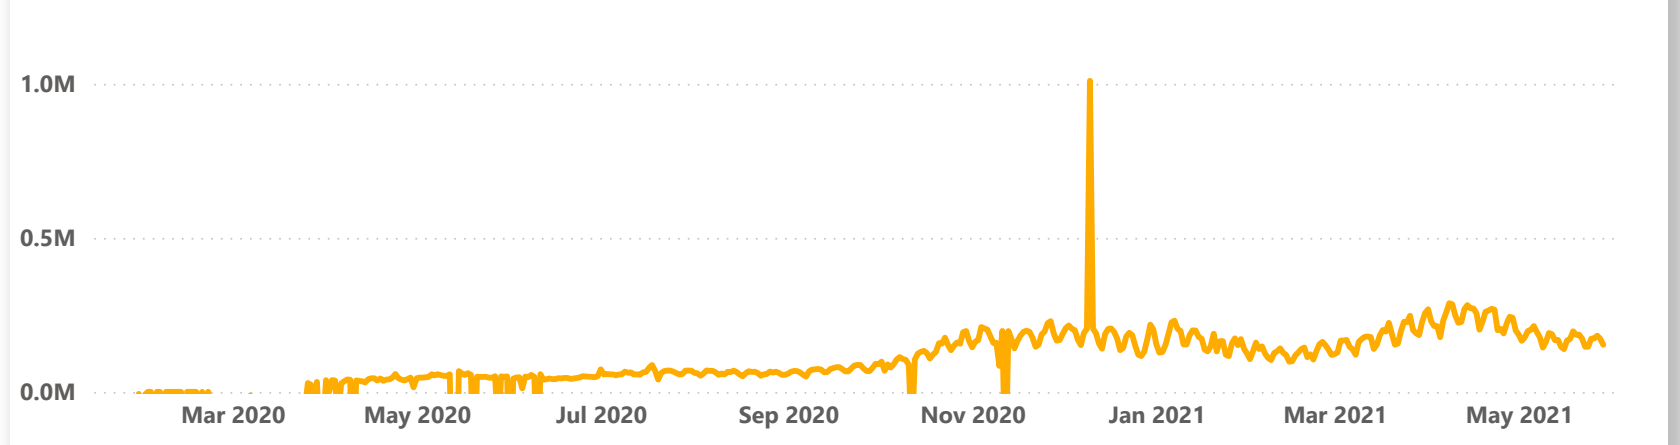

The U.S. leads significantly in daily new cases, followed by India and Brazil. France and Turkey trail far behind, indicating either lower transmission, smaller populations, or different testing/reporting standards.

Trend of Confirmed Cases

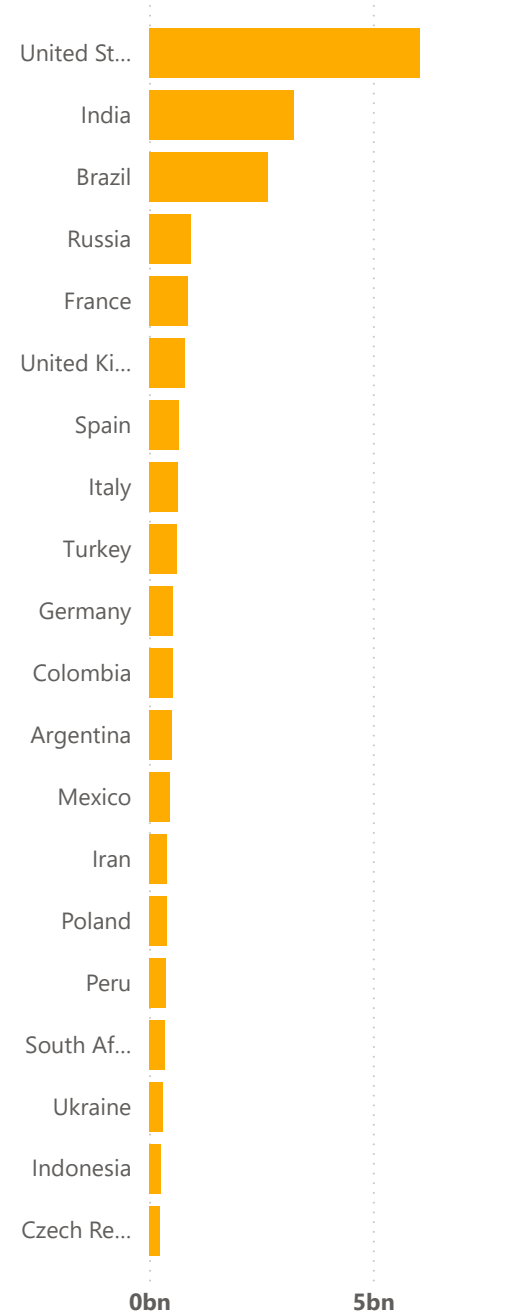

The confirmed cases show a steady exponential rise, with daily confirmed cases fluctuating more. A significant spike occurs around November 2020, suggesting a second wave or reporting anomaly, followed by high, but more stable daily numbers into 2021.

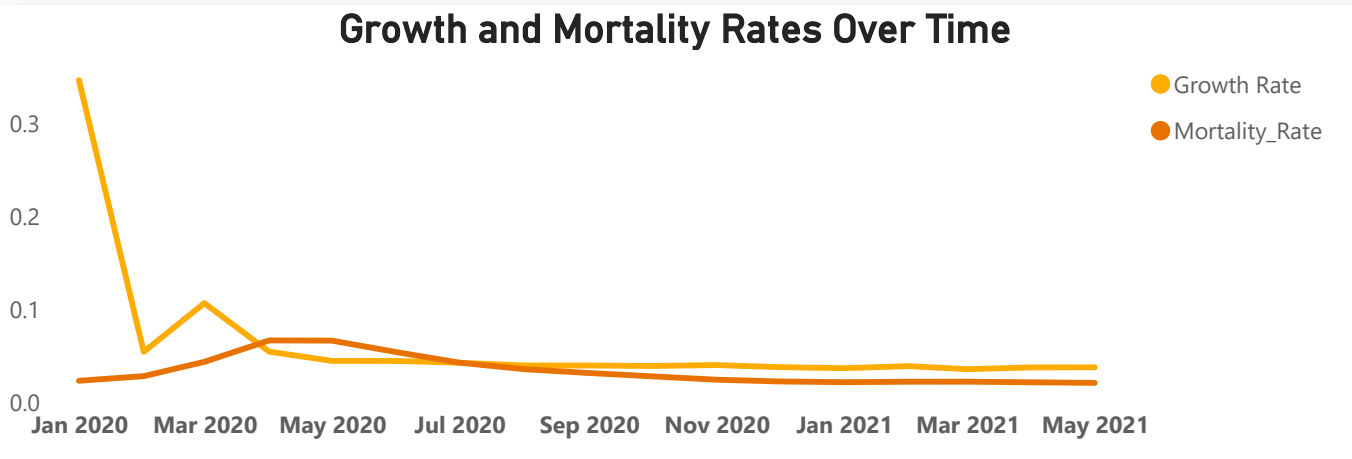

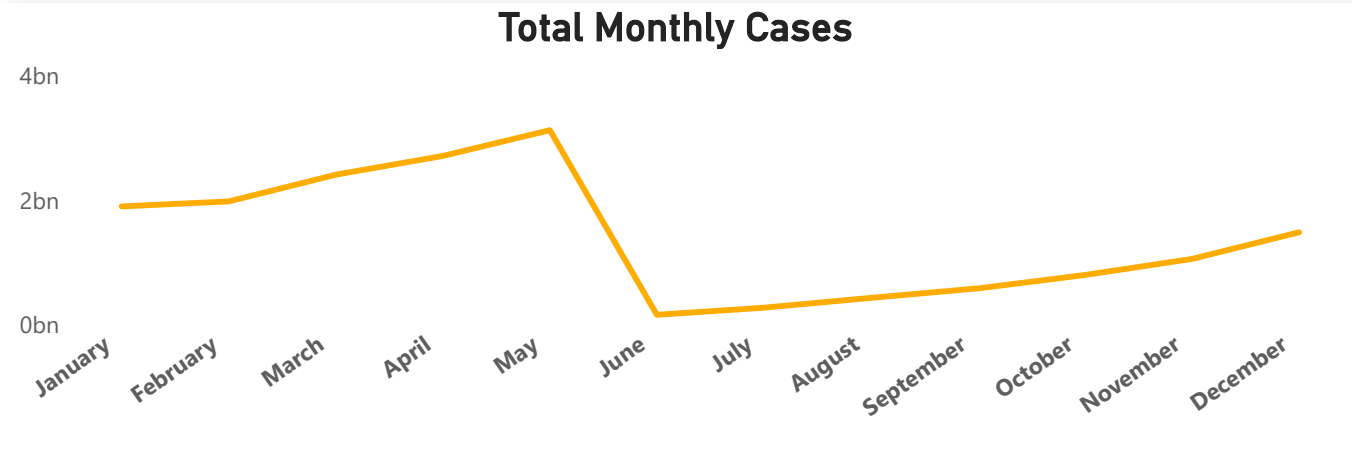

Global Daily New Cases

Confirmed Cases per Country

Total Deaths per Country

The U.S., India, and Brazil dominate in both confirmed cases and deaths, though Mexico has disproportionately high deaths compared to cases. Growth and mortality rates spiked early in the pandemic, with mortality dropping significantly over time, while growth stabilized. Total cases peaked mid-2020, dropped sharply in July, and rose again toward late 2020, indicating second-wave trends.
